Holiday Picture Frames

Supplies:

Med weight Tear-away or cut-away
White Felt for stitching design on
Colored felt for backing
Thread your choice
Ribbon
Glue Stick
Picture

Instructions:

Hoop stabilizer and white felt and then stitch design.

Remove hoop from machine and cut out center of design and trim close to the outside of design.

Now to size the picture!

Lay frame over picture, now trace around the open area where the picture is using a ball point pen or something that will crease the picture a little.

Trim around the creased area leaving some overlap on the picture.

Turn frame over design side facing down and with a glue stick, run glue around inside opening of frame.

Lay picture face down over opening and then turn over and center picture if needed.

Cut a square of felt larger than your design, turn design over and using glue stick add a good amount of glue all over back. Center design on felt and press lightly. Determine where you want your ribbon or cording to be, lift the design top and add a little extra glue then stick ribbon or cording in the glue and press down so glue will stick.

Let dry and then using pinking shears or other scissors trim around outside and you're done.
