

REVERSE Applique

INSTRUCTIONS

1. Hoop desired fabric and slide one layer of lightweight tear-away stabilizer underneath. Sew design until cutline stop in sewing sequence.

2. Remove hoop and use small clipping or applique scissors to cut directly on the cutline (the cutline is always the centre line.)

3. Remove cutout hole and reattach hoop to machine. Slide applique fabric under hoop to completely cover the hole.

4. Continue sewing all remaining colour stops in the design.

NOTE: Design may have more than one reverse applique, repeat steps for all.

Once design is finished, remove from hoop and turn design over. Cut excess applique fabric from around design.

5. Carefully pull remaining stabilizer from design.

FINISHED!
