

BEE #12 - TISSUE BOX COVER

Sometimes the simplest of embroidery designs have the greatest impact. Single colour, run stitch designs that are most often called “quilting” designs can be used in unique ways to embellish anything from clothing to home decor. Low stitch counts and single colour application means the embroidery will only take minutes to sew! Consider metallics for a little extra sparkle.

This Bee features high impact - low stitch count embroidery on a beautiful and versatile Tissue Box Cover. There are 2 different designs to choose from and the cover is fully lined and reversible!

Our fabric requirements make a finished cover to easily fit a standard 9" x 5" x 2.5" deep tissue box.
