

## Instructions for stitching the **FSL-Christmas Is Coming-Set-2-5x7** designs

These designs were digitized to be sewn on two layers of the “fabric-type”, water-soluble stabilizer. I use Pellon Embroidery Interfacing- Wash-N-Gone 541 from Joann’s. When removing the stabilizer, do not leave in water any longer than necessary-leave some of the stabilizer for stiffness. The lace is very delicate and will need to be blotted and shaped to dry. All designs are one color.
