

Wet Wipes Case

Created and digitized by Bonnie
for Designs By SiCK

PLEASE READ INSTRUCTIONS BEFORE BEGINNING

CC= color change

This in the hoop project is done in 2 hoopings and no other sewing is needed.

SUPPLIES:

- Tear-A-Way Stabilizer
- Fabric of your choice
- Plastic Coil Zipper at least 9" long or longer
- Threads of your choice
- Wet Wipes with flip open top. Huggies® Clean Team 42 count is what I use and it fits perfectly. Any of the wipes that are 42 to 50 count should fit with no problem. The plastic flip lids are close to the same size with most brands.

PREPARE FABRIC:

1- Cut 2 pieces of fabric 9"x9".

2- Take on of the pieces and cut it in half long ways (this will be the back 2 pieces.

After cutting, fold over about 1/2" and press flat with iron.

3- Find the center of the 9"x9" square and cut a small slit down center. This will help in removing the fabric center later on.

STITCH TOP OF CASE FIRST

TOP OF WET WIPE HOLDER

1- Hoop your stabilizer. Place hoop on machine and lay fabric over top making sure it covers the entire area of the hoop and slit you cut is in the center of hoop.

2- Stitch first **CC1**. This is will tack down fabric in place. Next, stitch center. It's best to use thread same color as fabric in this step.

3 - After the center stitching is done, remove hoop from machine and slip end of scissors into the little cut you made in the fabric before hooping and trim center fabric, cutting as close to the stitching as possible without cutting thread or stabilizer. Only trim away the fabric.

4 - Place hoop back on machine and stitch **CC2**, this is the quilt type pattern.

5 - Next **CC3** is the satin finish around the center. You can use contrasting colors to match your fabric.

6 - The rest of the Color Changes are the designs around the corners. Follow color chart or do your own thing. You can skip putting the design on at this point if you would like it left with only the quilt stitching on it.

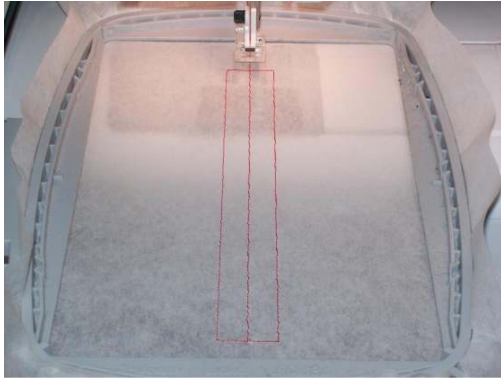

7 - Remove top from hoop and trim around stitching leaving about 1" or so extra, don't trim too close as it has to fit over top of the back and have fabric overlap so it can be stitched to the bottom of the case.
Remove stabilizer from center.

INSTRUCTIONS FOR BACK OF WET WIPE HOLDER

1- Hoop stabilizer and place hoop on machine.

2- Stitch **CC1**. This will be the placement for the zipper.

3-Place closed zipper (face up) over the placement lines, so that the coil lies on top of the center.

Also center the zipper in the hoop so that the metal pull and the closed end lie outside the stitching area.

The zipper pull must be at the bottom and the zipper end at the top. See Picture Below....

Embroider **CC2** to attach the zipper to the stabilizer.

Place the folded **left** side of bag bottom on top of the design (fabric side up), as shown below(left), so that the folded edge is up against the zipper coil (below left).

Secure in place with adhesive spray if needed. **CC 3** attaches the left fabric to the stabilizer (below right). Place other piece of fabric on right and then stitch **CC4**. This will tack down right side.

CC5 Will do the Decorative quilt stitching.

Now the last step – Unzip the zipper about a 1/3 way down so it is in the center area of design. You must do this or you can't open your holder when finished.

With top right side facing down, center and line up top.
Once in place lightly hold in place and start machine. This will sew the Back
and front together.

Remove from hoop and trim excess fabric.

Remove stabilizer from back of zipper and turn right side out.

Your holder is ready for the wet wipes.

Hope you enjoy making these wonderful covers.
They are great for gifts for friends, teachers, new moms or just for yourself.
