Candy Cane and Straw Toppers

All for the 4x4 Hoop

SUPPLIES

- Felt
- Tear-away or permanent stabilizer

INSTRUCTIONS

- Hoop fabric and tear-away or permanent stabilizer along with a piece of felt in a 4x4 hoop.
- Stitch the entire design up to the final column stich.
- Take out of the machine and attach a small piece of felt under the hoop covering the design. Place the hoop back in and continue stitching out the design When finished, unhoop and trim close to the design.

There will be an opening at the bottom to insert the end of a pencil, straw or candy canel.

If you would like to use these as straw toppers, it's best to insert a pencil or pen in the opening first to shape it for the straw.

This will help prevent the top of the straw from bending when you put it into the topper.

I used white felt but you can use your imagination and use any color you thing would bring out the design.
