

How to use

1. Wings of a bee embroider on a white organza
2. Cut the wings of the bee. !The wings must be cut out together: two wings make up one piece!
3. Embroider first three colors of the body of a bee on a water-soluble stabilizer
4. Put the bee's wings on the body of the bee. and holding, embroider last color that will attach the wings
5. After embroidering, wash and remove the water-soluble stabilizer. Then dry the bee. Before the bee is almost dry, you can give it a shape (slightly bend it in the form of a pipe so that the bee does not look flat and give a volume)
6. Attach the clasp of the brooch with a glue gun to the back of the bee.
