

Necklace

The first color is a line that indicates the location of the fabric. After embroidering the first color, you need to put the fabric that you will use as an appliqué

The second color is a zigzag, after which the tissue is cut off

Then the necklace is embroidered. Use the lower thread of the same color as the top, to get a beautiful result.

Insert

The embroidery of the insert differs in that two more colors have been added: a stitch and a zigzag, in order to place the insert on the fabric and cut out the place for embroidering the insert.
