

Decoration FSL should be embroidered on two layers of a water-soluble stabilizer.

If your water-soluble stabilizer has a high density, then you can embroider on one layer.

After the products are embroidered, the water-soluble stabilizer should be washed.

If it is a brooch or other product that must be tough and keep in shape, do not wash away the highly water-soluble stabilizer.

The product must then be dried. Sometimes you can use an iron, you need to put under the product and top a terry towel and iron it.

Then, according to your taste, the product can be decorated with beads, sequins, paillettes. And add hardware.

You also can make from the details of this design different decorations: necklaces, earrings, bracelet and other to your liking.

For connecting individual elements, you must make small holes with an awl or a thick needle and use connectors for jewelry.
