Stages of work in video

<https://www.youtube.com/watch?v=4fUWw-f1UyQ>

1. Download the design from the website to your computer.
2. Unzip the file. Upload the embroidery file to your machine.
3. Hoop 2 layers of water-soluble mesh. Embroidery the design.
Embroider the files 1, 2 - 6 times each.
4. Rinse the stabilizer in lukewarm water and leave to air dry. Press with steam.

It is important

Always make a test stitch-out of the design and wash away the stabilizer. This helps you to select the threads, needles, stabilizers and settings of your machine correctly.

To get 2-sided embroidery you should use the same thread for the needle thread and bobbin thread.

5. Stitch between the parts No. 1

You can do this either manually or with the zig-zag stitch on your machine

6. Stitch between the parts No. 2

7. Join the brim and the top

Thank you for your purchase.
