

INSTRUCTION

1. Download the design from the website to your computer.
2. Unzip the file. Upload the embroidery file to your machine.
3. Hoop the 2 layers of water-soluble stabilizer , taut like a drum.
Tighten the hoop well, to keep the fabric from slipping.
4. Embroidery the design.
5. Rinse the stabilizer in lukewarm water and leave to air dry. Press with steam.

6. Embroider some borders and sew them together.

It is important

Always make a test stitch-out of the design and wash away the stabilizer. This helps you to select the threads, needles, stabilizers and settings of your machine correctly.

To get 2-sided embroidery you should use the same thread for the needle thread and bobbin thread.

Thank you for your purchase.
