

FSL-Ribbon-Bookmarks-5x7-CF-NLS

Instructions

Required Materials.

These designs are stitch intensive, as are most free-standing lace designs and are to be sewn on a “**double layer**” of water-soluble stabilizer (the cloth-type, not the plastic-like stabilizer). You will need a double layer for each of the designs to fit a 5x7 inch embroidery hoop.

Use your choice of threads, but make sure to **use the same color in the bobbin as in the needle.**

When a design has been sewn, remove hoop from embroidery machine and design from hoop.

Cut away stabilizer, leaving about ½ inch around the outside to prevent cutting the satin border.

Submerge in warm water and swish until outside stabilizer falls away.

Blot between paper towels, then lay flat to dry. You can also place design under a book (or flat, heavy, object). Just make sure the design is placed between two pieces of clean, white, cloth, with the book on top.

Once dry, the bookmark is ready to receive a pretty ribbon. Cut a piece of ribbon 16 inches, fold in half and thread through the provided slots. The bookmark is ready to be given to that special person.
