

FSL-Gnomes-In-Cups-4x4

Instructions

The Chart below shows the design filenames.

1. Transfer design to Embroidery machine.
2. Hoop a **double layer of water-soluble stabilizer** in a 4x4 inch hoop (the fabric type, not the plastic type) and attach hoop to embroidery machine.
3. Thread needle and bobbin with same color thread.
4. Sew design. (This is a single color design.)
5. Remove hoop from machine and project from hoop.
6. Cut away most of stabilizer from around the design-leave at least ½ inch.
7. Drop design into a container of warm water and swish to remove the stabilizer. When the outside ½ of stabilizer falls away, remove the design and blot on a paper towel.
8. Lie flat to dry. If the design seems not to be as flat as you would like, place a book over it for an hour or so. It should become flat.
9. Tie a ribbon to the design and hang it up to enjoy or slip it into a greeting card as a token to a “Gnome-loving-friend”. These also are great to attach to a gift for those Gnome lovers.
