

Instructions

All my projects are done in the same way, the photos of this may not match, but the way of doing it is the same for all them.

The fabrics we use in these projects are: Felt which are the bases and different fabrics to the customer's taste.

Step 1: Place the stabilizer in the frame or fabric that is very light, make the first mark that the machine will present.

Step 2: Place the acrylic blanket over the frame marking, use the R2 blanket, sew the next step and cut off the excess embroidery border.

Step 3: Position the fabric, at that moment we use the felt that will be the base. I always choose white felt or skin color.

The felt you do not cut the excess.

Step 4: From now on, the machine steps will show the appliques that you will sew, you can use different fabrics according to your creativity.

Step 5: In the penultimate step of the machine, you will remove the frame from it and place the felt behind the frame to finish your pattern.

Felt

Okay, now just cut and it's over.

After sewing all parts of the project, you will paste and assemble your project according to the photo.

These are the pieces that you sewed

Steps to make the rabbit's head

First you start by sewing the ears,
follow the steps in the previous instruction

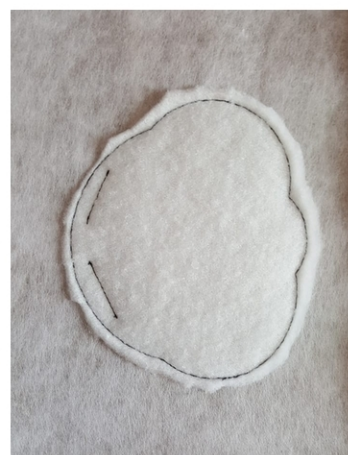

- 1 Place the head matrix in the machine
and let's start with the mark on the stabilizer
- 2 After marking on the stabilizer,
place the acrylic blanket, sew and cut the leftovers
- 3 Still on top of the acrylic blanket,
the machine will sew the third step which
will be marking the ears

1

2

3

Remove the frame from the machine
and secure the ears securely with tape

Return the embroidery frame to the machine and carefully sew the ears

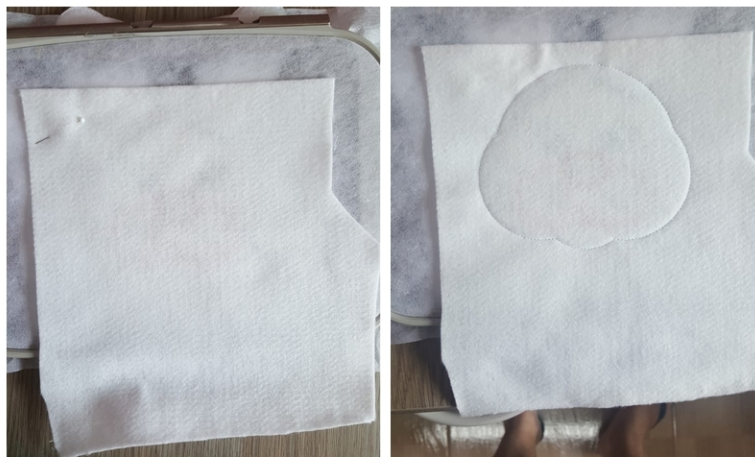

Remove the frame from the machine and place the felt, return to the machine and sew.

Continue with the steps the machine asks for until you reach the last step

Before performing the last step, remove the frame from the machine and attach a felt to the back of the frame, go back to the machine and sew the last step.

This is the total number of pieces
that the basket has

Now we are going to assemble
the basket by gluing the pieces together,
I will show it through the photos

Paste

Stick the head

Ready, it was beautiful !!!
