

Bottle Strap Holders

Please read all instructions before starting

SUPPLIES

Tear-a-way stabilizer or Vilene wash-a-way

Fabric of your choice

Thread

Cotton Batting or felt

1 yd Ribbon ($\frac{3}{4}$ to 1" wide)

Snaps or Rubber link toys you can find at Target or Wal-Mart.

STEP #1

*Hoop stabilizer and place hoop on machine and stitch out first color change (this is the placement for

the ribbon strap).

STEP #2

*place ribbon over top of this stitching and put a little piece of tape at top of ribbon if needed to help hold in place.

*Stitch color change 2. This will tack down ribbon in place.

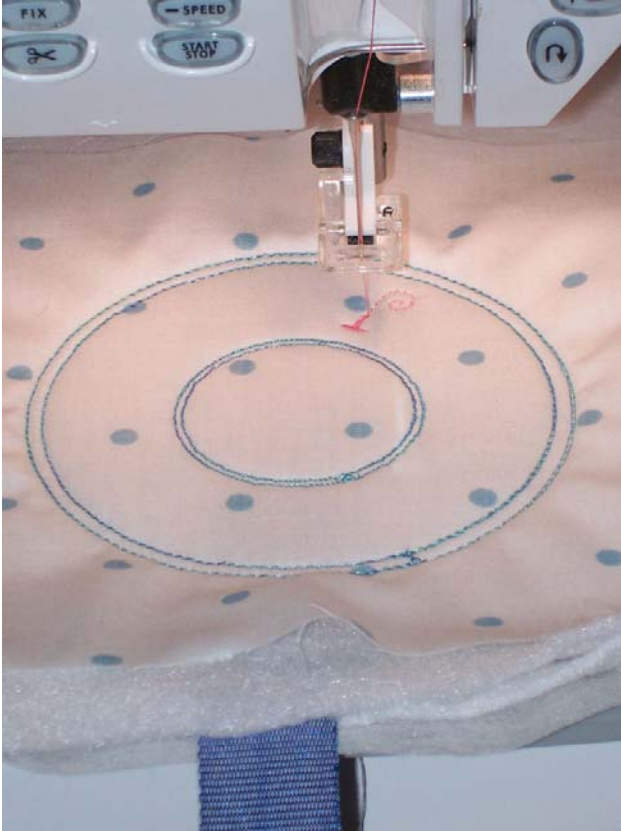

STEP #3

*Stitch color change 3, this is a placement stitch for padding and fabric.

*Place batting and Fabric over stitching and stitch color change 4(this will tack down fabric to stabilizer).

Next follow color chart changes for each design.

STEP #4

*After stitching design float another piece of fabric under hoop(right side facing down) or you can remove hoop and spray with temp spray glue and press fabric to back of hoop(this will hold your fabric in place).

*Place hoop back on machine if removed and stitch next color change(will be 2nd color change from bottom).

*After this remove hoop from machine and trim fabric close to stitching being careful not to clip threads. Also clip fabric and batting in center circle and remove same way.

STEP #5

*Return hoop to machine and stitch last color, this is your satin finish around the edges.

STEP #6

*You may make the length of your ribbon as short or as long as you like.

*Add a snap on end or sew a loop in the ribbon end and use the rubber link toys to use for attaching to baby buggy or high chair or where ever else you like.

**I found the rubber link toys at Target & Wal Mart.

Your Done!

Hope you enjoy making this great project to use or
togive as gifts!

Bonnie

-----WARNING-----

**Please do not use in the crib or leave baby
unattended while using the Bottle Leash holder.**
