

# Bugs in a Jar

## Please read before starting project

Supplies:

Fabric of your choice

Thread of your choice

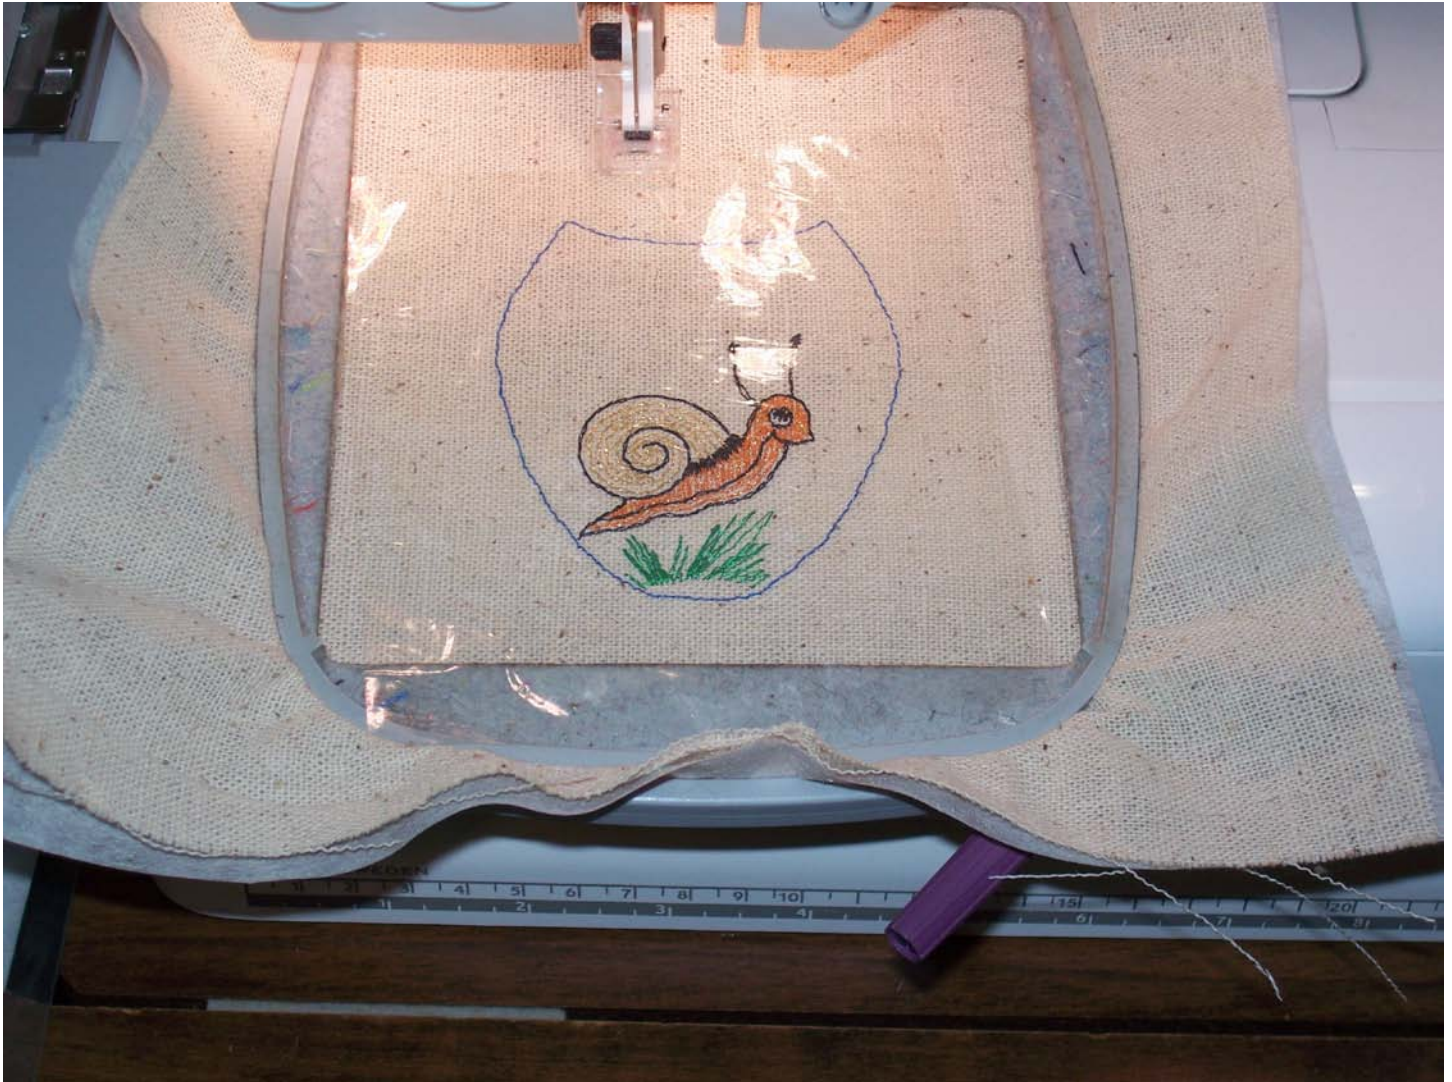

Vinyl – I suggest using the iron on type as it will hold up in the dryer better.

These are really simple to do and look so cute when finished!

The first color in all designs is the placement stitch for the vinyl then you stitch the you stitch the design.

After stitching the grass place your vinyl over the hoop and design.

Stitch the next CC – this will tack down the vinyl, after this re-move hoop from machine and trim vinyl close to stitching and then return hoop to machine and finish stitching.

Enjoy Stitching!
