

Biscornu

8 Point Pin Cushion

- 1- Stitch 1 front & 1 back design on fabric of your choice. Remove from hoop and trim around edge leaving about a ¼ inch seam allowance.
- 2- To sew together you need to match a corner of the top to one of the center sides of a back and whip stitch together by putting the needle through the thread stitch on the back and then through the top as pictured below. I caught every other stitch, then pulled up tight enough to pull together.

Go all the way around until you get to the last corner and then start stuffing. Make sure you stuff the corners first then continue take a few stitches at a time as you stuff until you have totally stuffed and sewn it together. Place a button on center top and bottom and go through cushion pulling the center together a little, tie off and you're finished.
