

Baby Puff

Materials:

child's craft foam
applique material
matching thread

On each Design, first 4 colors can be the same color.
The color changes are just stops so that you can attach the material.

The first 4 color numbers are the same for every design in the set

1. outline stitch

Remove hoop from machine, place a piece of craft foam over the outline. Then place a piece of material on top of the craft foam. Place hoop back on machine

2. stitch down craft foam and material

3. tack down craft foam and material.

Remove hoop from machine, cut material closely around stitching, craft foam can be cut, but it is easier to gently pull towards the design. It will tear away like the tear-away stabilizer. Any small pieces that are left can be removed with tweezers.

4. Detail line and satin stitch

babypuffdb001

I hope you enjoy these original designs from
Designs by Sick.

If you prefer, for a softer design, you can use quilt
batting instead of childs craft foam.
