Birthday Buntings

By Marlene

SUPPLIES

- Fabric
- Tearaway stabilizer
- Narrow ribbon or string
- Large needle
- Piece of stiff Styrofoam

SEWING

You will need to stitch out:
2 each of the H, A, P and Y
1 each of B, I, R, T, D

STITCHING

Hoop your fabric with a good tear-away
Stitch out as you would an appliqué leaving the stabilizer intact.
Don't tear-away the stabilizer until you've completed your design.

ASSEMBLY

Thread a large needle with the ribbon or string.
Lay an upper corner of your bunting flat on the piece of rigid Styrofoam. This will keep the corner from curling.
Take your large needle and pierce through the center of the small satin square.
Twist the needle around a bit to enlarge the hole.
Do the same to the other corner.

Pull your threaded needle through the bunting from the FRONT TO THE BACK coming through
to the back to the front. The way there won't be any ribbon or string hanging in front of your design.

You can use the blank to put in a name of message.**

There is also a large blank to fit a 5x7 hoop along with a large birthday cake.

**Keep watching the website for some additional designs to help you personalize your birthday buntings!!!
