

Zippered Coin Bags

4- 4 1/2 by 4 1/2 pieces of material

tearaway stabilizer

plastic zipper 7 inches long

stitch the zipper side first

1. stitching line for zipper, lay the zipper face up on line (I use tape to hold in place)
Don't let any metal parts of the zipper near the line.
2. lay one 4 1/2 block folded in half on the stitching line. Tape in place.
3. repeat #2 with the other side of the zipper
4. tear away from stabilizer
5. lay one of the 4 1/2 blocks sprayed with fast tack (or whatever you use) and stitch out the design
6. lay a 4 1/2 block on the underside of your hoop (this is for the lining)
7. unzip the zipper half way or where ever placement works
8. lay upside down on top, and tape in place
9. stitch final stitching around design
10. tear away from the stabilizer, and trim close to the stitching line

Turn right side out.

Enjoy!
