

POTW – Do It Yourself Cards!

by Rhonda

With all of the interest in stitching on cards and the questions surrounding this technique:

- How is it done?
- What kind of designs should I use?
- I want to make cards for all occasions, what should I use?

Rhonda has created a set of designs JUST for stitching on card stock – so you can create your own cards and embellish them the way you want!

This set is sure to pique the interest of those embroiderers who have dabbled in scrapbooking and those scrapbookers who have an interest in embroidery!

So, read the tutorial and then raid your craft corner (or the arts and crafts of your children and grandchildren) and see what you can come up with !

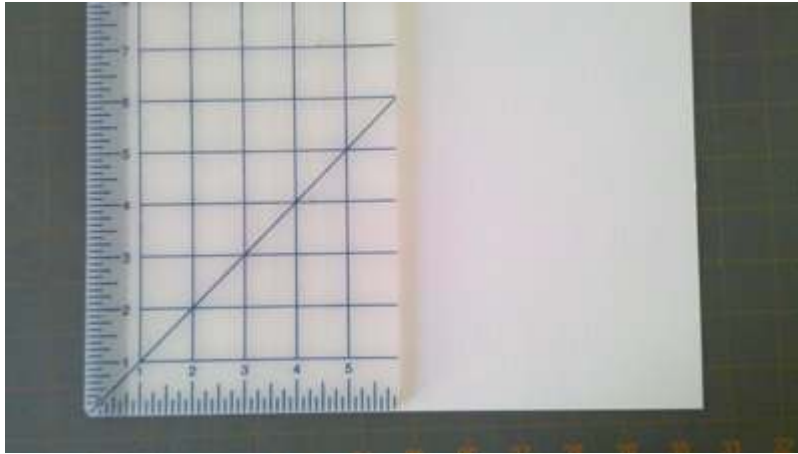

Rhonda's Do It Yourself Cards Design Set

Basic Instructions:

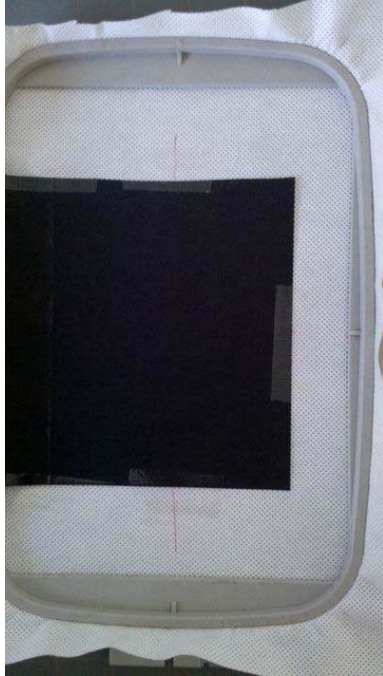

Step 1: Hoop a light tear-away stabilizer.

Cut a piece of card stock in half, then fold card in half again so that you will now have the front of the card.

Step 2: Mark the center of your stabilizer. Center the card stock in the center and tape down.

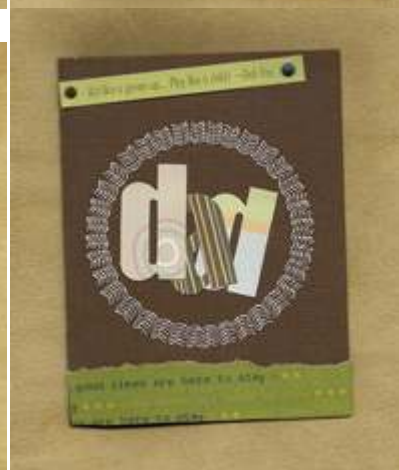

Step 3:
Stitch out the design. Remove from hoop and gently tear off the stabilizer being careful not to tug at the stitches.

Step 4: Mark the circle with a glass or any round object. Cut the center out of the card. You can now embellish the card however you want to. You don't have to cut out the center, that is your choice.
