

Free Standing Mylar Christmas Ornaments

Supplies needed:

- Water-soluble Stabilizer (fabric type)
- Embroidery thread with the same color on your bobbin

All designs will stitch in a 4x4 hoop

Hoop your Water-soluble stabilizer

Wind the same thread on your bobbin as you are using as your top thread

The first thread color showing is red, but use the thread color you chose to do the background and outer border. The red thread color is simply a thread color stop (similar to an applique) to give you placement for the mylar. (You can stitch all in one color or use 2 colors, one for background and border and another for the letters. Or you can use three different colors, whatever fits your taste)

Stitch the outline

Spray lightly back side of mylar with KK2000 (if you use another spray test it first on the mylar)

Place your mylar

Stitch the background

Stitch the letters (If you use a different color also wind your bobbin with the same color as the top thread)

Remove hoop from your machine and carefully tear away excess mylar. Put hoop back in machine and stitch cover stitching

When done stitching clip the jump stitches and trim the stabilizer

Soak the design in water to remove the water soluble stabilizer. After soaking, gently blot the excess moisture and lay flat to dry. You can also press it right side down under a dishcloth.

And voila, your ornament is ready to use.

Enjoy!!

Merry Christmas
